JEREMIA PAULUS

I am **Jeremia Johanes Mikhael Paulus**. A motivated Junior Backend Engineer with hands-on experience in building backend services using Go (Golang) and Java. Familiar with PostgreSQL for database management, and experienced in designing RESTful APIs, background services, and system integrations. Familiar with Kafka for real-time data streaming and Docker for containerization and deployment. Eager to learn, grow, and contribute to building reliable and scalable backend systems in a collaborative environment, clean code practices, and system performance optimization.
